

Agile Culture

Understand the Direction or Challenge

1

Experiment Toward the Target Condition

3

Establish the Next Target Condition

Agile Leadership

2

Grasp the Current Condition

4

IMPACT OUTCOME AND VALUE

Agile Manifesto

AGILE COACH

Daily Coaching Cycle  
20 minutes

1. What is the Target Condition?
2. What is the Actual Condition now?
3. What one Obstacle are you addressing now?
4. What do you expect from your next step?
5. How quickly can we go and see what we have improved?

Measure Value

Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.

Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage.

Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.

Business people and developers must work together daily throughout the project.

Build projects around motivated individuals. Give them the environment and support they need, and trust them to get the job done.

The most efficient and effective method of conveying information to and within a development team is face-to-face conversation.

Working software is the primary measure of progress.

Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.

Continuous attention to technical excellence and good design enhances agility.

The best architectures, requirements, and designs emerge from self-organizing teams.

Simplicity—the art of maximizing the amount of work not done—is essential.

At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly.
